- Do not operate this or any appliance with a damaged cord or plug or in abnormal state. If its main cord is damaged, it must be replaced by the manufacturer or the nearest service agent or qualified person.
- Do not let the cord hang over edge of table or counter, or touch hot surface.
- Do not place on or near a hot gas or electric burner or in a heated oven.
- Do not use the appliance for other than its intended use.
- Make sure that your outlet voltage corresponds to the voltage stated on the rating label of the Waffle/Sandwichmaker.
- Any examination, repair or adjustment for the appliance should be made by the authorized service agent.
- If the supply cord is damaged, it must be replaced by the manufacturer or its service agent or similar qualified person in order to avoid a hazard.

THIS UNIT IS FOR HOUSEHOLD USE ONLY SPECIAL INSTRUCTIONS

This appliance has a polarized plug (*one blade is wider than the other*). To reduce the risk of electric shock, this plug will fit in a polarized outlet only one way. FEATURES OF YOUR OSTER® WAFFLE/SANDWICHMAKER

PREPARING WAFFLES

1. Close unit and plug into outlet. Use only voltage specified on bottom of unit. The Power On light (Red) will come on. The Ready light (Amber) will not come on.
CAUTION: Touch unit only by handles during use or directly after use.
2. The unit is ready for use when the Ready light comes on.
3. Open unit and pour approximately 3/4 cup waffle batter onto grids. For best results, pour batter in a circle around outer edge of Wafflemaker. Close cover. It is very typical to have a small amount of batter run over grid and down unit. However, if an excessive amount of batter runs over, use less batter.
4. Cover will rise slightly as waffles begin to bake. Do not open cover while steam is escaping. Most waffle recipes bake in approximately 4 to 5 minutes. Waffles are generally done when steam no longer escapes from sides and front of unit.
5. When waffles are done, remove with a plastic fork or wooden tongs.
NOTE: The Ready light may cycle on and off during cooking. This indicates that the thermostat is maintaining the unit at the proper cooking temperature.
6. Close cover and wait for Ready light to come on before preparing another batch of waffles.

PREPARING SANDWICHES

1. Plug the power cord into the AC outlet.
2. Before use, please preheat the Sandwichmaker for 5 to 8 minutes. The red power on lamp will be on. When the amber lamp goes on, it means the Sandwichmaker temperature is ready.
3. Coat the inner plate of the machine with butter or margarine to prevent sticking.
4. After preheat, open the Sandwichmaker, place a piece of bread of approximately 1/2-inch thickness on inner lower plate. Coat one side of the bread with butter or margarine and place on the plate against this side.

5. Add filling on it, taking care not to overfill.
6. Put another piece of bread over the filling, and coat top with butter or margarine.
7. Close the Sandwichmaker slowly.
8. After about 2 to 3 minutes, open the machine and remove sandwich. Sandwichmaker can be stopped at any time by unplugging the power cord from the AC outlet.

CAUTION:

1. When it is difficult to close the machine, it means that too much filling was added. You should reduce the filling or replace with thinner bread to prevent damaging the Waffle/Sandwichmaker.
2. When removing sandwich from machine, do not use any utensil that may damage the non-stick coating. Use wood or plastic suitable for high temperatures.

CLEANING INSTRUCTIONS

1. Unplug and allow unit to cool before cleaning.
2. Wipe outside with soft, dry cloth when Waffle/Sandwichmaker is cold. Never use metal polish.
3. You can remove the heating plate to clean with soft cloth, warm water and dishwashing liquid. Before resetting it, you should allow it to dry thoroughly.
4. If Waffle/Sandwichmaker is used frequently, accumulated bread crumbs should be removed at least once a week. Make sure any accumulation under plates is completely removed before using the Waffle/Sandwichmaker again.

HINTS FOR TASTY WAFFLES

1. Do not over-mix waffle batter. Beating egg whites separately and folding them gently into the batter surely will create a lighter, crispier waffle.
2. Completely bake waffles before removing from unit.
3. Don't open the Wafflemaker while steam is escaping from sides and front of the unit.
4. Why not freeze prepared waffles for those busy days ahead? Just bake the waffles as directed. Cool on a wire rack and wrap in moisture-proof paper or plastic. Quickly reheat in your toaster oven, broiler or microwave oven.
